New MC Views

MC Views using currently avilable data:

- MCText - dump of SimSnarl info.

- MCTree - tree view of particles showing parent/child relationships.

- MCVectors - simple Draw() of TParticles in SimSnarl.

MCparticle

- New object/module/stream/package

- Correlates:

  particles $\leftrightarrow$ FLSHits $\leftrightarrow$ FLSDigits $\leftrightarrow$ RawDigits

- REROOT not exposed to user.

- Mostly working now, some memory issues to clean up.

- Big thanks to Sue for much help.

UI

- Can add Pages via menus

- For Multi, can add Gfx via menus

- Can configure Gfx via graphical popup Registry editors

Misc

- Some success in getting libsigc++ and CINT to play nice. Can get libsigc++ signals to cross compiled/interpreted boundary. Rt dead?

- No demo: MINOSSOFT is currently fscked. But, see TriD's.
